Context

Item Description	Details
Purpose of this interface	Receive participant Cost Share related details from MMIS.
External system that Blue Compass will interface with	Wisconsin MMIS
Interface Direction (Inbound/Outbound/Both)	Inbound (MMIS to Blue Compass)
Transfer Protocol (Webservice, SFTP, etc.)	SFTP
Where is the file sent to or picked up from (End-point or Landing Zone location URL)?	Gainwell Connect
Connectivity Protocols/Encryption/Authentication (VPN Tunnel, SSL Certificate swap, etc.)	SSH Key
File Type (xml, .csv, delimited flat file etc.)	fixed length .txt file
Frequency	Monthly
Timing Considerations (e.g. Day of the week and/or time of day files will be sent or available for pickup), or (When files are not available e.g. system maintenance windows, etc.)	n/a
Retry procedure for file expected but not (received/available) or otherwise successfully delivered.	n/a
For inbound, what field(s) are used to match to data in Blue Compass?	Participant's Medicaid ID (Member ID)
Is every file a full file (reconciliation), or a delta? If a delta, will full files occasionally be sent/received? If so, how often?	Delta
Is there a field that represents the last time a row was edited, either a date or a datetime?	n/a
How are deletions handled? That is, if a data was sent previously but is no longer valid.	n/a
How are updates handled?	Updates received in the incoming file will override the existing records in Blue Compass.
If there are multiple files in the interface: What field(s) are used to link them together? If there is an update in one file, will all the matching records be updated as well? For example, when a person's address changes will the update record include only the new address, or will it include a refresh of all of the person's addresses, or a refresh of all of the person's information?	n/a
What is the file naming convention? (Ideally all files will have CCYYMMDD_HHmm as part of the file name)	DMS-CMM-WI_PRD_IRIS_COST_SHARE_EXTRACT-M-[YYYYMMDD_HHMMSS_3-digit millisecond].dat

Business Rules

BR #	Description	Source Notes
BR-D04-001	"Member ID" and "Cost Share Month" data elements will be used as matching logic to identify an existing Cost Share record. If there's no match, a new Cost Share entry will be created in Blue Compass. Else is there's a match the existing Cost Share record will be updated accordingly.	
BR-D04-002	Daily Waiver Member file may contain more current cost share amounts since MMIS cost share data can be updated daily.	
BR-D04-003	Cost Share payments are manually entered by FEAs and are not part of this interface.	
BR-D04-004	The monthly file from MMIS indicates each participant's Cost Share amount for the month in which the file is generated. It also includes the next (upcoming) month and the previous 4 months.	
BR-D04-005	Cost share amount is specific to an individual participant.	
BR-D04-006	When cost share amount changes a notification should be sent to the IRIS Consultant (IC). Details on the notification messages and triggers are maintained in the notification master list.
